

LEARNING PLAN

for Indie-rose [REDACTED] 2024

A OVERVIEW OF MY
APPROACH TO TEACHING
THAT SUPPORTS INDIES
INDIVIDUAL NEEDS

My foundation for indies natural learning approach to education for the upcoming year is based on pursuing passions, satisfying one's natural curiosity, and learning through life.

For the past 3 going on 4 years ,Indie has been home-schooled following a natural learning-child led approach , as she has been home-schooled in both NSW and Tasmania along with her 2 younger brothers. This approach to Indies learning has proven exceptional as when we first tried a formal learning approach she was filled with anxiety, became disinterest and lost the love for learning , now she is full of questions , full of curiosity and is always ready to have a go and try new things.

. ————— .
o

Indie learns best from truly having passion for something she chooses, and becomes highly motivated in acquiring new knowledge, information and skills in that particular thing, through her own self research and very determined attitude. Once Indie has her mind set on something she excels in it. She often turns to youtube how to videos, google searches and her tight knit of friends on her chat forums, or She comes to seek out and conform in me when she has a question , needs help with something she doesn't quite understand or when she needs resources she cant find through her own self research. Indie is very comfortable and confident if she needs help , she will just come straight to me and seek it as she knows she has my 100% support . Indie is always encouraged to have a go and have real hands on opportunities within our home and out in the community, Her interests are always changing,so she is constantly acquiring new skills and new knowledge, covering all the key subjects.

By allowing indie to engage in real life hands on opportunities, to participate in helping with "real world things", is preparing her for adulthood.- chores, cooking and learning valuable maths and science terms, going into shops herself and learning valuable social interactions ,money handling skills and oral communication , running her own youtube channel and creating and editing her own videos using various online software (capcut,recordit,canva,lightroom) expanding her tech and digital art skills ,creating and selling her own "virtual/digital" inventory (she creates and markets her own roblox avatar clothing, roblox gfx's thumbnails is currently her new passion/goal in which she has been practising and learning new techniques .I have been helping her with editing using canva program ,giving her feedback and ways to improve them- she has been loving the feedback,and really taking it onboard with her designs.

Indie holds her own competitions online (drawing and roblox builds) and she has coded her own chat forums, in discord and roblox and even has created and coded a few actual roblox games that people have played, Indie learns from events and opportunities in our community from cultural and historic to fun and interactive school holiday programs that engage all her 5 senses. Indie learns so much from our nature trips and adventures in nature, where we together as a family end up always finding something new and interesting that we observe and have open discussions about, I call this wild-schooling. Indie has been learning sustainable practices and helping tend to our veggie garden," She loves to help me with my online business, (nature inspired home-school/teaching resources) and she is my go to person in the family if I need feedback or help with some "tech/design" aspects for it, as I know Indie is brutally honest, she lets me know how I should showcase things as she has great eye for detail, and digital design. She helps with my digital marketing and sometimes stages photo probs for me

TEACHING STRATEGIES THAT SUPPORT INDIE THE BEST ARE

- BY ALLOWING HER TO USE HANDS ON EXPERIENCES IN THE REAL WORLD
- BY LETTING HER LEARN NEW SKILLS AND KNOWLEDGE FROM ON THE SPOT LEARNING IN DAILY LIFE THROUGH OPEN CONVERSATIONS AND SELF RESEARCH.
- ALLOWING HER THE FREEDOM TO FOLLOW HER PASSIONS AND INTERESTS
BECAUSE THEY ARE ALWAYS CHANGING AND SHE IS FOREVER LEARNING SO MUCH NEW SKILLS AND KNOWLEDGE COVERING ALL THE KEY SUBJECTS
- AND BY ALLOWING THE NATURAL ENVIRONMENT AND COMMUNITY TO BE INDIE'S THIRD TEACHER .

LEARNING PLAN

for Indie-rose

2024

ABOUT INDIE-ROSES LEARNING ENVIRONMENT AND TIME ALLOCATED FOR LEARNING

As Indies learning is based on natural opportunities and daily life -her learning is free to take place anywhere in our house .We have a dining room filled with large glass doors that overlooks bird filled trees and a valley.This is setup as our "makerspace" we have a large table with plants and shelving on the walls filled with arts and crafts supplies, nature specimens ,books, chalkboard as well as some of my learning posters I have created on the wall.We have a computer area set up under our stairs in loungeroom with a desk,printer and laminator for whenever Indie or her brothers want to use it,- Indie uses this space daily ,our lounge-room, her room, all our outdoor setting spots, indie is often sitting outside on our deck lounge when its warm, researching on her phone writing and drawing in her numerous books,or reading. Not to mention our 1 acre land, indie has been learning sustainable living practises ,helping with regenerating and cultivating and feeding the wild chickens,Indie has unlimited access to explore our family home and yard

along with all our indoor learning spaces, Indie also has other wonderful learning spaces. These include our island community (library, museums, farmers and artisan markets, shops, historic landmarks, tourist sights, festivals, classes, events, that come up throughout the year (i will record these for my learning portfolio as they happen) the school holiday programs Indie attends every holidays, and of course our friendly neighbours and Indies grandma who has moved over.

TIME ALLOCATED FOR LEARNING

Indies learning is not restricted to a strict time schedule put into modules and time restraints. Her learning is not only to take place between 9-3, 5 days a week. Indie will always be learning as her learning entwines with her life. Indie is free to learn about a particular topic when and for how ever long she decides

INDIE IS A LIFE-LONG LEARNER,,

LEARNING PLAN

2024

for Indie-rose

SHORT AND LONG TERM GOALS FOR INDIE

SHORT TERM GOALS

My short term goals for Indie is to keep allowing her to follow her passions and interests as these have so far provided her with a huge variety of experiences and knowledge covering english, maths, history, science and technology. I will continue to keep providing answers, support, help and resources she needs to meet these requirements. We will be pursuing Indies business venture ideas for this year and will be one of our main focus's , She wants to turn her roblox talent into being able to make some real money (creating and selling her GFX thumbnails, continue to create more roblox virtual inventory to sell, aswell as up her youtube channel content and start posting live videos of her gaming (we have been discussing about turning our outdoor guest house area into a recording studio for her to record her gaming and youtube videos, so she will be able to use her speaker and produce more video gaming content, because she says we are all to loud inside for her and she really wants to get heaps more into her videos) Indie will continue to grow and sell her own produce as this is something she is intersted in, She will continue to attend every school holiday program for the following year as Indie really enjoys these, and is having so many fun, unique and educational hands on experiences.

LONG TERM GOALS

Indie has always had a dream to open her own cafe when she is older, This is still something she says she is interested in, I will continue to support her to reach this goal for the future by providing classes, certificates and any other resources she requires. She loves visiting the cafes around the island and often draws sketches and plans of what her dream cafe will be like , she does many roblox cafe builds and is very into designing her dream cafe (this is always changing) She also really enjoys creating and editing videos and would love to become a very famous youtuber, she continues to put in the hard work , researching, creating and modifying her youtube channel to make it the best version she can and this is something I think she will succeed in the future with as she is very passionate-
about it.

I will always provide unconditional support and allow Indie to continue to experience the world around her with real hands on learning, our new island community provides so many great mentors for Indie to learn from.

SOCIAL INTERACTIONS

in place for Indie-rose

Indie has so many friends now, and has really become confident with other children and I am not worried one bit about her social life. Indie is very sociable and is always hanging with other kids, each week she rides her bike with her brothers to the park, (a few times a week) and they meet all their friends there and play for hours, she goes to holiday programs every holidays with all her friends and other kids, (3-4 days a week) -she attends most events and festivals on our island community. On a saturday its usually a meet up day somewhere either park, or surf .She has and will continue to have play dates and hang out with her friends at our house, their house, at the beach,etc Her grandma has moved over so Indie has a sleepover at hers atleast once a week,Indie has alot of friends on the island but also alot of close online friends from all over the world she is always texting in chat platforms and having phone calls with. She is always encouraged and loves to join in on our adult conversations and frequently goes into shops herself to order

I also cant forget to mention her numerous aunties and cousins and extended family who will be visiting for holidays ,and nanna she loves to chat to on the phone and tell her all about her week. Indie is a very active, confident young girl who lives a very full life, full of encourgament,acceptance and support.

LEARNING PLAN

for indie rose

2024

HOW I WILL KEEP TRACK OF INDIES LEARNING PROGRESS THROUGHOUT THE YEAR

For the last 3 years i have been keeping track of her learning by writing new skills and interests she has , down in her learning journey journal (a notebook I keep and add resources she has used,questions she has asked ,skills she has acquired and any other relevant learning activities done) - so i will keep using this recording method.I also take photos of any hands on learning activities she has done,places she has visited and keep any hard copy worksheets/drawings/paper based resources.I put them into a visual learning portfolio(plastic sleeve folder) i always add dates and a brief paragraph about what she has been doing)

THERE IS NO
LEARNING
EXPECTATIONS,
JUST
ENCOURAGEMENT
,I TRUST SHE WILL
LEARN EVERYTHING
SHE REQUIRES
WHEN THE TIME
COMES FROM IN
THE MOMENT
LEARNING

WAYS WE WILL COVER LEARNING AREAS

By using Hands on skills in daily life, following child led passions and interests. And by allowing the natural environment and community to be Indies third teacher will help her learn english, maths, science, technology, history, the arts and culture

"WHEN CHILDREN BECOME CURIOUS, THE BRAIN BECOMES A FAST MOVING INFORMATION GATHERING TOOL THAT ENCOURAGES LEARNING. WHEN WE ARE CURIOUS WE ARE EAGER TO EXPLORE, DISCOVER AND FIGURE THINGS OUT. CURIOUS CHILDREN NOT ONLY ASK QUESTIONS, BUT THEY SEEK THE ANSWERS."--INDIE CONSTANTLY SHOWS ME THIS EACH DAY.

LEARNING PLAN

for Indie-rose

2024

Ways we will cover the Australia curriculum for Indie using a natural learning approach

ENGLISH WRITING

ANGEL SEED SCHOOL	
Breakfast meals:	
pancakes and orange juice	-\$4
sandwich with orange juice	-\$3
salad and grape juice	-\$3
lunch Meals:	
food plate with fruityfruit	-\$5
avocado sandwich and water	-\$4
sushi and fruityfruit	-\$7
snacks:	
salmon and coke	-\$7
chicken nuggets and fries	-\$7
Salad and protein shake	-\$7
ANGEL SEED SCHOOL	

- Continue to Use online gaming and software to interact with her online friends through writing messages, writing instructions and rules in the online servers and videos she creates , her vocabulary is always expanding this way, she has also been creating alot of online digital marketing “posters for roblox” in canva

- Daily use of web search platforms like google,youtube and apps to type in things she wants to know about, also auto spell on her phone has proven helpful with her grammar.

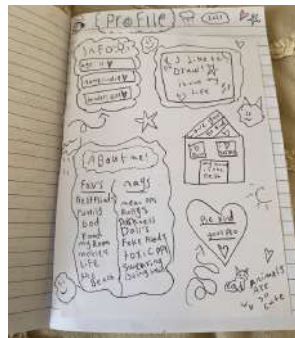

She will continue to come to me if she needs help with spelling a word or what a word meaning is (she has learnt about silent letters, and homophones this way)

- She WILL ALWAYS be encouraged to ask for assistance (i also go over and discuss any writing she does for her youtube videos,online bios and public online writing for spelling mistakes before she posts -this has proven great as she rarely makes mistakes anymore, we are continuing to improve her capital letters in the wrong places , this way.

- I have my own small business creating digital home-school / classroom worksheets covering a huge variety of nature based topics. Indie will often go to our filing cabinet and complete a few of these worksheets whenever she likes. This is not rigidly enforced, but i love her feedback, she also completes a few question sheets I give her and her brothers each month for their home-schooling portfolios

SPEECH

- Indie is a very sociable girl and is able to have great conversations with people of all ages-she frequently goes into shops herself to order and buy things and will continue her public speaking by being encouraged to always join into our adult conversations,being asked her opinions (which she is always brutally honest) and by being asked questions
- Indie rose also loves chatting on the phone to her online friends from all parts of the world each week,
- Once she starts creating youtube videos using her voice(which she wants to start to create, when we turn the guest bedroom into a recording studio) she will have alot of public speaking and time to reflect on her english .
- I will continue to help indie improve her spoken vocabulary by helping her sound out words she is unsure with ,aswell as words she says that are incorrect (usually silent letter words and words that seem the same like caf=cafe and reality=realty) as example. At the moment she is constantly mis saying staff without the silent "r" she continues to say staff instead or s t a r f , which i continue to correct her on.

READING

Reading is a big part of daily life, it is everywhere. Indie has been able to teach herself how to read by following her interests. She is constantly reading when she plays online gaming, walks past shop and community signs, web searches, instructions and when messaging friends. She is very good at reading.

She will continue to follow her passions which inevitably lead to the reading of something new, engaging her curiosity and expanding her reading vocabulary

- Indie will continued to be encouraged to come to me or her father when she needs help with reading a word or help with understanding what a word means, this happens a few times a week and i have noticed that once it clicks (sometimes she will ask 2-3 times)she won't ask again as she now has learnt that new word
- Indie will continue to use the community and her daily life for reading opportunities, from signs,plaques,tags,posters,instructions,online gaming and all other opportunities that come up.
- Indie occasionally will read a real book, but quickly gets distracted or disinterested , I plan on adding more books this following year to our book collection, I plan to get some " teen" novel books - books i get and she reads will be recorded.

Indie reads everyday on her online gaming, youtube and google browsing and texting friends in discord, Indie is very good at reading and often says alot of American slang,as she reads and watches alot of things based in America- its quite funny and i have to keep correcting her. (ketchup for tomato sauce, candy for lollies)

RESOURCES USED FOR ENGLISH

iphone,ipad,computer ,online software and apps ,canva,blender (others will be recorded when she uses them) roblox,minecraft,youtube,google,her own personal notebooks,pencils,my printables www.barefootchild.info and etsy-BarefootChildCo, aswell as printables from www.mymegabundles.com ,signs,information and the other reading opportunities provided by the community, the local library (books indie actually reads will be recorded as they happen) any other resources she has used will also be recorded as they happen

LEARNING PLAN

for Indie-rose [REDACTED]

2024

Ways we will cover the Australia curriculum for Indie-rose using a natural learning approach

MATHS

Indie is really good at maths and simple math concepts- she is constantly using them each and everyday through life, maths is everywhere

- We do **mental maths** quite a bit throughout the week, and it has been our main learning strategy in learning maths for the last few years- examples of this, is I will randomly ask Indie and her brothers questions to see who answers first (I have found this is a fun way for them to learn as they like to compete) I ask large additions, multiplications ($\times 2, \times 5$ and $\times 10$ we are mastering) as well as other maths strategies (can you share these equally, what is half of that, what time is it , We have been practising a lot lately on percentages, Indie finds it easy to understand and work out what 10% is or even 20% is but when we try work it out by taking it off the asking price, she has a hard time trying to work it out (eg" 20% of \$40 is \$4 so $40 - 4 = 36$) we will continue to work a lot on her percentage this upcoming year, as she has been interested a lot in them lately. We will continue to use mental maths this upcoming year.
- I have just created and plan to hang up some maths posters in our learning area as well as the bathroom this year, which will have a lot of 2d/3d shapes, 1-100 multiplication charts, percentages, and more

- **cooking**- Indie enjoys helping from time to time with cooking in our family home, she also attended a cooking class this year at her holiday program cooking traditional food- Cooking provides Indie with a lot of maths learning, from measuring in mls and cups, weighing in grams, and kg and learning about volume, temperature, chemical reactions, ratios to name a few.

Indie will continue to be involved in helping out in the kitchen, she enjoys using my new cappuccino machine and making her father and I coffees and herself a hot chocolate, Indie also enjoys making homemade yogurt in which she has to get the correct temperature and measurements for water to the yogurt powder precise, she has also said she would like to get little jars to make yogurt to sell here on our island- this will be something we will work towards this year.

shopping and pocket money- Indie and her brothers earn pocket money from doing household chores- she is encouraged to keep track of her own spending, she has her own commonwealth bank, youth bank account) she has the app on her phone -netbank which helps teach her budgeting, goal setting, saving, interest rates ect and how money works. I add her pocket money to it and she uses that to buy the things she wants (usually robux) she gets to see graphs and tallies. - we will continue to use netbank this year as-well.

- ————— •
o
- Indie will often read shop tags and signs while we are at the shops mainly surrounding “sale items” where we discuss percentages and decimals and other maths concepts, she will use the scales in weighing and asks lots of questions - we will always continue this type of hands on maths on our outings, this years no different. We will continue to work a lot on her percentages this year.

- **Maths in online gaming and Indies interests-**

Indie is constantly using maths concepts when playing her online games, from designing roblox house builds using geometry, shapes, scales, dimensions and length, to answering maths questions in certain roblox games, as well as earning robux online to buy and spend on inventory - (using her addition, budgeting and subtraction skills) .She uses maths and math strategies like Area, Volume, fractions and sums in the game minecraft also .She uses maths when creating her roblox videos by using timing and grids. She creates her own roblox games using the program roblox studio that her and her friends can actually play - this includes alot of maths concepts . She will continue to use her interest in online educational gaming and software to further her mathematical knowledge and is always encouraged to come to me if she needs help with concepts or answers. As She gets older and her interest change- so will her math skills.

- 
- **selling produce in road side stall ,running a etsy /fivver store and selling eggs,seedlings and any other prospects indie has.**

Indie will learn so much maths by having real hands on engagements in her own buissness ventures this upcoming year , just like this year 2023 she learnt so much maths by selling her own pumpkins in a road stall from working out inventory, calculating weights ,pricing accordingly to the weight,rounding to the nearest dollar,money exchanging and working out the correct change to give. She plans on selling much more this year once our crops are ready including pumpkins,watermelons,peaches and she has tomato and pumpkin seedlings she wants to sell. Indie also has other buissness ideas to sell in her own road side stall (a table setup at the front of our property)-alot of island kids do this also. Some ideas are making homemade yogurts, selling some of my buissness products hats,clothes ect, we will be getting chickens soon, she would like to sell the eggs and other ideas. Indie is a little entrepreneur and is expanding her "gaming knowledge" to try make some real money, she has been able to set up a product to sell on her own fivver account (promoting she can do someones roblox home interior) create the listing,work out her selling price and more -she is learning how to master creating GFXS to sell on her discord , we have been looking alot into print on demand sites lately as she wants to sell her own merch (tshirts) so we will work on this further this year and set her up a etsy account . We have been collecting washed up corals and indie has been making fridge magnets ,she plans to sell on etsy - (we planned to do this,this year 2023 but time got away and went so fast ,so we will do it for this upcoming year 2024) this will teach her so much from managing inventory, learning how to price a product,learn about profit, shipping, writing descriptions to sell a product, she will be able to watch real time product charts for views,likes and sales ect on Etsy and fivver.She loves to help me in my business and will continue to be involved. Any other hands on maths she gets up-to this year will be recorded in my journal.

- worksheets, books, iphone and printables I create for my business covers many different maths concepts, indie is free to fill in these worksheets if she likes - as we take a natural approach her maths is based on (everyday maths, and maths concepts that are relevant to her life)
- Indie's iphone has great tools for her to use - calculator and stopwatch, maps, apps and timer. As well as the bathroom scales, the scales measure weight, water, muscle and fat measurements - her fitbit measures her steps, distances,

If she ever decides she would like a maths workbook or other math opportunities come up I will also record them in my journal.

RESOURCES USED FOR MATHS

iphone, ipad, computer, online software and apps, roblox, minecraft, canva, fivver, printful, fitbit, capcut, (others will be recorded when she uses them)

youtube, google, printables from www.barefootchild.info and etsy-BarefootChildCo, as well as printables from www.mymegabundles.com, etsy, notebook, pen, calculator, measuring cups, measuring spoons, kitchen appliances, scales, netbank app, any other learning apps or maths resources she uses will be recorded in my journal

	how big they are	sell for
1	2-6 kg	5.00
2	1 kg	4.50
3	500g	4.00
4	150g	2.00
5	100g	1.50
6	50g	1.00
7	1kg	12.00
8	500g	4.00
9	100g	8.00
		16.00

equation	\$k	For	kg	how many kgs
1	$4k = 8$			2
2	$k = 6$			1
3	$4k + 4k + 4k = 24$			6
4	$k = 12$			1
5	$4 + 2 = 6$			1.5
6	$2k + 4 = 12$			3
7	$k = 8$			2
8	$4 + 4 = 8$			2
9	$4k + 4k + 4k = 16$			4

LEARNING PLAN

for Indie rose [REDACTED]

2024

Ways we will cover the Australia curriculum for Indie using a natural learning approach

SCIENCE

- Indie as well as her brothers have always enjoyed nature and the outdoors ,We experience science daily on our outings from observing rare birds and fauna on [REDACTED] island,collecting and observing insects on our plants ,watching cows and calves roaming the streets ,feeding chickens and chicks, noticing the different changes after storms or dry spells ,nature hikes and so much more,We always discuss what we see with each other as a family,this is always changing as we come across something different,A couple of days ago we were collecting sea salt of the rocks that had dried up ,we discussed how the wind and sun evaporates the water and leaves the chunks of salt behind and that its called solar evaporation

and Today we went over to our neighbours house who has a bore, as we were getting some water delivered for our water tank. Indie learnt that there is water pockets underground which are from rain that seeps underground and is stored in spaces between rock and soil and that the layers and bodies of water in these underground spaces are known as aquifers. We watched as they pumped the underground water up. Every week indie is learning new science concepts by in the moment everyday living.

- A new experience for us since moving to the island is the beautiful snorkelling bays around the island, Indie has been snorkelling and observing the amazing coral formats, different fish, sea creatures and the underwater ecosystem. We will continue to snorkel ,discuss our findings and discover new things this upcoming year also. This previous year I made a few eye spy checklists that indie and her brothers had fun completing on the various things they observed underwater and on the beach. Ill be making many more worksheets like this for this upcoming year as they had such fun (this will be saved in my records)
- Indie will continue to watch various youtube videos and shorts covering alot of science concepts this upcoming year- Indie usually will come tell me some cool facts she has learnt like cows like to play for fun and love to play with balls, and cows form very close friendships with a few cows, she is always watching interesting youtube videos (i keep notes in my record journal of things discussed) SHE ALSO LIKES TO MAKE EXPERIMENTS she sees on youtube, some previous ones this year are are making slim, making a lava lamp and changing the colour of celery -just to name a few

Indie also has been helping tend to our 1 acre plot of land, we plan to grow all our own produce ,we have all been busy planting alot of new crops and harvesting. Indie is able to maintain and watch the growth and change of her plants. We currently live sustainable on solar power and water tanks, this year we have been discussing what organic means ,how solar panels work and photosynthesis.

We came across some caterpillars on our tomato plants so we created them a environment in a jar,

and watched them turn themselves into cocoons, This was exciting for indie and her brothers to see, they have yet to emerge as butterflies ,that will be even more exciting

- I have created a mini bee unit printable and we have just received a bee lifecycle resin specimen in which Indie will be able to learn more about pollination, how honey is made ,the lifecycle of bees and the importance of bees. this is something we will be pursuing this year 2024, I also have several other lifecycle specimens on their way in the mail (as i am getting them to sell in my store) I will be creating printables for them to for indie and her brothers.
- Indie learns alot of science when she is seeing how things are done or used whether at home or out in the community. Indie is always curious, she loves to ask questions and find out new information from on the spot natural opportunities. She will continue with this approach for the upcoming year of home-schooling, and i will come continue to support by answering all her questions and providing the resources she needs (I will record anything learnt done in my journal).
- My printables as-well as the seasonal mega bundle printables cover a huge amount of nature and earth science and natural learning (its what we specialise in) for whenever Indie may want to explore and complete these
- **books on our shelf** - in our book collection we have lots of science books for whenever Indie would like to read, she has (already read most of them but often flips through again and again) usborne lift the flap books- see inside science,questions and answers,general knowledge,questions and answers about recycling and see inside climate and weather We are always finding great "living books" at the local opshop and library box and i am ordering more of the usborne lift the flap books for next year. We just got usbornes first nature butterflies and moth book, indie has yet to read(books will be recorded)
- This upcoming Monday we have the islands royal Agricultural Show that indie will be attending with her family, she will learn so much at this , i will be taking notes and photos for my records

Our caterpillars who have turned themselves into chrysalis, indie has been busy observing the lifecycle of a butterfly, she can't wait until they finally emerge

RESOURCES USED FOR SCIENCE

signs around the island, natural environment
iphone, youtube, google, snorkles, garden
, garden tools, printables-www.barefootchild.info,
www.mymegabundles.com, books mentioned above (other
books, resources and software used will be recorded, as well as
documentaries and experiments she does in my journal, also photos
will be taken)

LEARNING PLAN

for Indie-rose

2024

Ways we will cover the Australia curriculum for Indie using a natural learning approach

TECH

- Indie is very advanced in the technology department- she has taught herself how to code, how to create and edit her own youtube videos for her channel, how to create her own Roblox games and merch (clothing) and how to create her own roblox and discord servers, through self research, watching how to videos, using different apps and software and asking me for help if she was unsure- we will continue with this child-led approach to tech, she has been working a lot with the app canva and blender to create GFXS (rendered art) and also learning how to produce a product for sale. She is forever advancing and learning new skills, she is very smart when it comes to technology as that is her area of interest. She is learning new video editing skills and growing her youtube channel. She has around 650 subs and over 300 videos (a lot are shorts) she will continue to follow her passion for video creating and tech next year
- she is STILL currently very interested in discord (a chat platform for her youtube followers and roblox friends to come together and share ideas, drawings and message each other- she has created her own server, with automatic bot messages, spam finders and loads of coding. She is always updating, changing or adding new codes and finding new ways to "advance" her servers to the best optimised way.

- Indie gets to have hands on experiences in our home using our tech and appliances and is always encouraged to try new things, this will always continue to be part of her home-schooling. To be evolved in life skills, try new things and learn from doing
- Indie learns alot of "tech" concepts from managing her own fivver store, youtube channel,discord servers, when we open her up a etsy store aswell as her netbank"
- any other tech related learning done throughout the year will always be recorded, and photos taken where nessary for my records

RESOURCES USED FOR TECHNOLOGY

Youtube,google,roblox,capcut, canva,blender ,
minecraft,iphone,ipad,computer,home
appliances,netbank,etsy app, usborne books
mention above, (other apps,software and tech
resources used through year will be record as they
happen) our community

LEARNING PLAN

for indie-rose

2024

Ways we will cover the Australia curriculum for Indie using a natural learning approach

HISTORY & SOSE

Our new island community is filled with lots of great historic sites, convict and settler history and amazing culture . This will continue to be our main focus for history again this year, as there is still so much to see and learn about in our new island community

We have spent the last several months exploring history sites, attending culture festivals (the [redacted] day)- where indie got to watch a re-enactment of the first settlers, she has attended the spring fair and seen the traditional ways of food and weaving. We have the upcoming agriculture show and wearable art extravaganza all showing local and traditional ways in October .

She has already visited the old convict prison, blacksmith shop, salt house and historic cemetery and we have yet to visit the [redacted] museums , which is on our bucket list We have learnt so much about the history and convict past from the site signs all over the island at landmarks and will continue to go to all the historic sites, museums this upcoming year. [redacted] is full of wonderful culture and traditions and we are excited to get to explore, see, watch and taste these throughout the year with the upcoming events and festivals , they also celebrate [redacted] here to, so this is something indie is looking forward to. Indie and her brothers are also learning some simple [redacted] language words as the locals often say it to them.

- Many printables I have from both mine and my mega bundles cover many history subjects from dinosaurs, famous world landmarks and historic figures and many more for whenever Indie may want to explore such topics. This year 2023 she learnt more about Australia and the aborigines and She has been quite interested in japanese lately especially japanese girl style trends, so i am planning on making a japanese mini unit for her to learn more about for the upcoming year.

Indie has also been attending the school holiday programs every holidays that are full of lots of fun learning experiences, each time they are new and different experiences covering all subjects including history and traditional ways.- i will keep record of these

- I'm sure throughout the year Indie will read, watch and be immersed in lots of history and culture activities engaging her curiosity and understanding of how different modern society has changed over the decades as she has learnt so much history already over the past few years, with trips to museums, old mines, historic sites open conversations and abc tv shows like horrible histories and others

RESOURCES USED FOR HISTORY

Youtube, historic sites and events around [redacted] island, (i will take photos of these when we visit for my records)

www.barefootchild.info - my printables, iphone, www.mymegabundles.com, other resources, programs or places she visits will be recorded

LEARNING PLAN

for Indie-rose

2024

Ways we will cover the Australia curriculum for Indie using a natural learning approach

THE ARTS

Indie's main focus of the arts continues to be digital art. She loves online design and applies them everyday to her online gaming, video creations, marketing poster materials, gfx designs and more. Indie has such great design skills and a very good eye for detail. She uses so much thought and detail when she is designing and decorating her Roblox house builds and is very interested in the interior design aspects. Indie uses a lot of techniques and design in her YouTube video creations, from special effects and sound recordings to colour filters and adding elements. Indie is trialling some of her designs to start selling them for money, these included creating and editing GFXS, offering her designing skills on Fivver, creating her own art competitions on Discord, joining into others art competitions on Discord. Indie is always finding new ways to learn new digital designing skills, she has been using my printable making app lately called Canva in which she is really enjoying creating her own designs (YouTube video thumbnail pictures, posters for her Roblox houses, marketing material for her comps and build battles, gfxs, and so much more). Indie will continue to allow her interest in online design to be her main focus for "the arts" this upcoming year- I will continue to support her and provide resources she asks for, offer her the feedback that she seeks and have good open conversations on how to better her work if we can.

music,art,-

- There is music festivals held throughout the year on the island, - we will attend, also many art galleries on the island we plan on visiting but haven't got around to yet- at the end of October we have the wearable art extravaganza in which Indie said she really would like to go - so we will attend, indie will get to see all the unique "art clothing" the local artist make for the fashion show. - i will take pics for my records
- Indie also really enjoys sketching and drawing in her numerous books,we always reflect on her drawings and she tells me all about them,her drawings are from what she is interest in, they mainly include anime as she loves to practise, she watches numerous online how to Youtube videos and is continuing to get better, she joins her friends and other youtubers online art competitions and loves to craft. She has stated she would love to learn how to knit this upcoming year, we have got her some knitting needles and yarn, we have watched a few youtube videos on how to, but found them quite confusing so her best friends mum said she will help teach her as she knows how to knit. This is something indie is looking forward to.
- **drama** - Indie often role plays on roblox with her online friends and brothers, playing scripts and real life roles- she uses alot of drama and makes movies of real world scenarios for her youtube channels- Indie will continue to follow her interests in pursuing " the arts" through her interests.

RESOURCES USED FOR THE ARTS

youtube - various videos indie watches (i will try keep note of them) iphone, ipad,our art supplies, paint,papers,pencils,sketch pencils,craft materials,etc,knitting needle,yarn, roblox canva,capcut,discord, events will be recorded with photos for her portfolio. other resources she uses throughout the year will also be noted down, community,

has created

LEARNING PLAN

for Indie-rose

2024

Ways we will cover the Australia curriculum for Indie using a natural learning approach

PDHPE

Indie and her brothers are very active and live a very healthy lifestyle, Indie goes for surfs, swims, and snorkelling throughout most weeks, in the hotter months most of the day is spent being physically active and outdoors. We often go on nature walks, beach comb or exploring of some kind. She rides her bike to the shops and to the park a few times a week to meet her friends. She has been getting very interested in soccer, unfortunately there isn't a team on the island, but Indie and her brothers are always playing at home and take their soccer ball to the park to have games with all the kids, everyone gets excited when they arrive with the ball. Indies grandma lives just up the road so indie goes for walks to visit her every few days, in the holidays she attends a program in which they are always active. I have no concerns for her physical fitness for the upcoming year, we will continue to live a full healthy and active life, learning along the way. Indie has her own fitbit which she is always keeping track of. She eats a lot of healthy home-grown organic and locally sourced food from the island that we always have open discussions as a family the health benefits.

Indie and I have discussed personal hygiene and self care over the years, she takes pride in her appearance, sometimes needs a reminder of a shower, but she loves to dress her best when going out.

- We have discussed online bullying and how to stay safe when online, also about scammers and cybercrime, Indie frequently will ask me if something doesn't seem right when she is online, We have discussed about not given out her real name or address online so she goes by the name of angel
- Indie watches operation ouch on abc me some afternoons where she learns all kinds of things about our bodies, she will continue watching this and is always encouraged to come to me if she has a question
- We always discuss possible dangers, what to look out for and what to do if they require help whether in the water, bush walking ,around hazards ,wild weather or from stranger danger. when the opportunity arise we discuss these
- We will continue to discuss more as she grows about her body,what to expect when she reaches puberty (which she is in the early stages) and any other questions she may have, we have a close relationship and the kids are always encouraged to come to us if they have any concerns or questions

RESOURCES USED FOR PDHPE

surfboard,snorkle,iphone,soccer ball,holiday program operation ouch-abc me , bike (videos,activities and other resources will be record and photos for my record

Indie is surrounded by a rich learning environment filled with lots of great hands on learning opportunities that engage all off her 5 senses. To learn by following her interests and from daily life - will help provide Indie with a learning style that suits her individual learning needs, and is easy adaptable as she grows and if her interests change. Indie is surrounded by a loving family eco-system who trusts in her to learn all that she requires, when she requires it. She is always encouraged to try her best, to ask questions and to be involved in life activities. To me this is the best kind of learning environment to create a lifelong learner. To create a motivated thinker and to create a young adult , ready to adapt to adulthood and the changing future.
