

PROGRESS REPORT

2023

For Indie-Rose [REDACTED]

MY IMPRESSIONS ON THIS YEAR OF HOME-SCHOOLING

We made a big move last December in buying a house on a tiny island ([REDACTED] and) out in the middle of the ocean, so naturally I wondered and worried how Indie would adjust to home-schooling this year and I couldn't be happier or more proud of her. This by far has been the BEST home-schooling year we have had, not only for Indie, but together as a family (we have been active home-schoolers since 2020) This year for Indie she has been immersed in so much culture, history, festivals, sustainable living practises and for me to watch indie come out of her shell ,find her place in this world and become a confident young lady in our community island, brings me so much joy. When we first moved to the island (start of the year, indie was VERY shy towards other children, we often would go to the beach or park and she would shy away from other kids and swim off by herself or not want to go where she seen other kids play

(because she said she was shy and nervous, I could see how nervous she was to as sometimes she would shake)- this went on for the first few months but NOW indie has the most friends she has EVER had. She meets her friends at the park several times a week, we arrange surfing and play dates all the time. Indie attends the school holiday program every holidays, with her friends in which they do activities and visit places on the island, She has meet a lego master, and had a lego workshop day, meet a clown and had a circus workshop day, (she came home showing me her new juggling skills and how she spun a plastic plate on a stick) she cooked traditional island food,mudda! visited the police and fire station, had scavenger hunts around the historic sites on the island , she also visited the botanic garden and national parks were she learnt about the native and rare species of the island. Had a farm tour day and arts and crafts workshop day, plus so many other amazing, fun ,hands on and interactive learning opportunities this year.

Indie has also attended many local festivals this year , like just last week was the spring fair- There were local craft and food market stalls, big waterslides and music. Indie walked around and brought many luck dips with her friends, and was interested in watching the traditional weaving lady who was running a stall.

This year she has also attended ██████████ Day - where we got to watch a re-enactment of the landing of the first settlers and their traditional celebrations (all the locals dressed in their traditional settlers clothes and paraded around town, also we had a picnic highlighting traditional food and other activities as celebration.. We have the upcoming Garden Week & Royal Agriculture and Horticultural Show coming in October, indie will be attending, and she has also said she would like to attend the Wearable Art Extravaganza thats at the end of October in which amazing talented local designers create outfits out of ART according to each category.-we will attend this also. There is so much happening on our island community throughout the year, there is always something on or something that pops up which are full of great natural learning opportunities for Indie, to grow,learn and be apart of.

Almost weekly I get compliments on how well mannered, polite and how well Indie handles herself for her age when she is out with friends, roaming the island or going to shops herself. Im very happy when I hear this, as I know indie is growing into a little lady, learning from daily opportunities and real world experiences.

Indie lives a very full ,rich life, we are always outdoors exploring, adventuring and learning something new together . Indie has been helping grow our own vegies, cultivating our land and learning about sustainable living this year. (Indie and her brothers have been selling their own pumpkins out the front of our property with their own stall setup twice so far last month they made \$183 !!) she was quite the entrepreneur , she weighed each pumpkin with her brothers,to work out each price (\$4kg) cut them into pieces ,wrapped in glad wrap , priced each one, made little signs and setup their stall, they had so many of the local customers coming around to buy from them, it was so great to watch her using her customer service skills, money handling and working out the correct change using mental maths.

This year has been filled with such great personal growth for Indie in making connections with other children and also the amazing things she has accomplished with her very determined self direct learning . She is still very passionate about her youtube video making, and everyday continues to expand her video editing skills, she was very excited this year , to have been picked by a famous youtuber with nearly 1 million subscribers to be in their youtube video and do a roblox house build together (as indie is very clever and creative, and has such great online design skills and eye for detail when she uses ROBLOX as her virtual creative studio)

Indie has a love and passion for creative design and online coding, she uses these skills everyday and is always finding new ideas on how to expand and put her work out there. This year She has continued to constantly create, edit and add new videos to her youtube channel (that she fully setups up and manages herself and currently has 650 subscribers) she has her own discord servers and roblox groups in which she manages and codes herself, she created these so her followers and friends can come and exchange ideas, share their drawings, and chat, This year Indie has also held many of her own giveaways and contests on her servers, from drawing to build battles in which she plans, designs the rules, banners and promotion material and gives the winners robux. This year Indie has also started her own fivver account to put her roblox build skills out there and see if she can get customers, She has recently been learning how to create and edit GFX's (roblox glossy edit type of thing) - she has been practising almost daily as she has told me she wants to be the best at it so people can pay her to create them one, she currently has been making them for all her friends for free and they love them.

MY FOUNDATION FOR INDIE'S NATURAL LEARNING APPROACH TO EDUCATION IS BASED ON PURSUING PASSIONS, SATISFYING ONE'S NATURAL CURIOSITY, AND LEARNING THROUGH LIFE , AND THIS YEAR SHE CONTINUES TO PROVE TO ME THAT THIS IS THE BEST POSSIBLE APPROACH FOR HER EDUCATION.

Indie is surrounded by a rich learning environment filled with lots of great hands on learning opportunities that engage all her 5 senses. To learn by following her interests and from daily life has and will continue to provide indie with a full education To be able to have in the moment learning opportunities side by side alongside her family ,to be allowed to follow her passions, learn about real worldly things out here in the real world and not behind a desk, to have unconditional encouragement and support and to always have the resources she requires and answers she seeks available. To me this seems like the best kind of learning environment to create a lifelong learner. To create a motivated thinker and to create a young adult , ready to adapt to adulthood and the changing future.

spring fair - 16-9-23

traditional cooking workshop 13 july

exploring heritage sites/attractions on [redacted] different times throughout year

lego master workshop - 5 july 23

indies realistic "makeup effect broken arm" she got done by a makeup effect artist at a show day/hall market for the community -26-8-23

botanic gardens , museum - 7 april 23

PROGRESS REPORT

2023

For Indie-Rose [REDACTED]

DID YOU ACHIEVE THE GOALS OUTLINED IN YOUR PROGRAM?

As we take a natural learning approach to Indies education our main goal was to continue to allow her to follow her passions and interests ,as these have so far provided her with a huge variety of experiences and knowledge covering english,maths,science,history,tech and so forth, to continue to allow her to learn at her own pace and for me to continue to support her needs and provide her with the resources she requires and help her with her questions and anything else she seeks, so yes our goals for that were achieved. We did have a goal of seeing if there was an art class on the island Indie could join at the beginning of the year, as she loves art, but unfortunately there isn't, but that doesn't matter to Indie, she still loves to draw and continues to practise from how to youtube videos and holds her own art competitions on discord. Another goal we had was for Indie to grow and sell her own produce in her own stall, which she did get to do, we will continue to do this as our crops continue to grow,as Indie loved this, we have recently been planting and growing seeds in trays of various fruit and veggies currently she has (watermelon,tomato,pumpkin) so Indie and her brothers want to sell the seedlings when they grow bigger. She did want to open her own etsy store ,selling coral we collected and we haven't gotten around to this yet ,so this will still be something we will work on in the near future , we have been collecting and making coral fridge magnets.

DID YOU MAKE ANY CHANGES TO YOUR PROGRAM?

No, we didn't need to, as our program was based around Indie learning from her curiosities and interests, from our daily life, community events and in the moment learning opportunities. Her learning program was tailored to be adaptable as she grew and curiosities changed and her program was able to be flexible and suit Indies own self determined interest based -child-led learning. Which she continues to prove, is the best style to suit her individual learning needs.

WHAT WERE THE HIGHLIGHTS OR LOWLIGHTS?

Highlights this year

Indie making so many friends and coming out of her shell, for me being able to see her so confident with other kids makes me happy, she has always been confident with adults but to see her be able to hang out and interact with other children this year with confidence is the highlight of the year. Oh and finding out they had a free school holiday program every holidays, that Indie and her brothers can join with the other (school kids) is great, they really love it and Indie has so much fun, this is the first year they have done anything like it.

lowlights this year

Indies dad tore a ligament/tender in his ankle in April, so since then Indie and her brothers haven't done much surfing since his accident, as dad cant take them out, they love surfing, we have finally just heard back when he will be having surgery 3-6 months, so we all will get to fly over to Brisbane for that, so that will be fun and Indie will get to see, learn and have alot of new experiences. She cant wait for Mcdonalds she said and to visit the brisbane museum and attractions.

WHAT AREA DID YOUR CHILD ACHIEVE THE MOST SUCCESS?

Indie Achieved the most success in technology, she continues to amaze me how advanced her technology skills are, through self research, trial and error, how to videos and asking me for assistance when she needs it, she is always learning new coding skills ,computer and gaming hacks and progressing with her programming skills. Indie loves technology and when it comes to figuring out how to do something new (from something she has seen) she becomes very determined to learn all that she can, I will often try help when she cant figure something out and together we sit through a video and figure out together. But then there are other times when Indie just picks up so easily new skills and applies them, and i am just amazed. She has even figured a few things out for me in using my printable making software canva, and on my web design or if I need help with making a video , l'll go to her and she helps me add music and shows me how to edit.

WHAT APPROACHES DID YOU USE TO SUPPORT YOUR CHILD IN COMPLETING THESE SAMPLES?

English samples

As we take a natural learning approach for Indie, I helped by providing her with the resources she needed and asked for, when she required them. I spent time with her reflecting on certain mistakes and discussed correct terms, whenever she asked and we used every opportunity for questioning and open conversations. Indie learns best by having “open discussions” and real “in the moment then and there reflections”- when I say this I mean, if she is writing something (usually for her youtube channel ,online gaming, forums,or an online blog post etc she will ask me how to spell a word that she is not sure of, or ask me if her grammar is correct or what certain words mean, we then and there discuss the correct terms, reflect and have good open conversations, and I have noticed that usually one to two times after that discussion she picks it up and does not make the same mistake, Over the last 3 years of home-schooling and learning through natural opportunities Indie has been able to learn nouns, verbs, adjectives, expand her written and spoken vocabulary, advance her reading and so much more this way. This year she is getting much more interested in her punctuation and grammatical conventions. We have been working on these by having open conversations and “mini on the spot lessons” We have been discussing her capital letters a lot this year, as earlier in the year with her written work (not online/keyboard) but when she would write on paper, she would use a lot of capital letters at the start of most words, and not at the start of a sentence. You will notice in SAMPLE 1 I have attached a written account I had Indie do for her home-schooling portfolio earlier this year, we had open discussions on her punctuation and grammar mistakes frequently since then and as you can see from her other sample also included in sample 1 for comparison- from last month, our open conversations and natural learning approach to her English is working.

In her english SAMPLE 2, I have attached some of her "online writing" this is how indie mostly uses her writing/reading skills ONLINE. It is hard to get samples of this writing as its in chat platforms/ all over the place on various apps ,videos,bios, discriptions etc,but I think its important to include these in her samples, as each year her written vocabulary , the way she sounds "sophisticated" and spelling is progressing . I have included one of her published works , she created herself which is a roblox build battle competition she held last month and created the promotional material herself for,and posted it on her forum on discord. I did not include a comparison from last year for you to be able to see the progress, as it was hard to find samples online and save BUT i know how much she has advanced, I used to have to check her writing before she went live for lots of spelling mistakes etc and now she is posting content on her youtube etc with no spelling mistakes. In the sample, I could see that she planned ,had given thought, and showed passion and maturity in what she was doing, she included external links she had coded herself - since then we have discussed her CAPITAL LETTERS at the start of each sentence for next time.

2023
27 MAY hi, my Name is indie. we FINALLY Did it we moved to Northolk island Right BEFORE christmas! im very GLAD to Be here! thanks to my mum And DAD we could Buy this Beautiful home. i REALLY Love to DRAW And SURF, very into singing to ahah. im improving my DRAWING EACH DAY! so cool lol

i Just want to say never give up, Always's Look Forward ^{indie} Love yourself And Be Kind. i've made A few Friends on the island yay!

i've BEEN wanting to Do A job/website- i have no iDeA what to Do it AS tho lol. ♡ ♡ im very CRAFTY! ♡ ♡ xoxo

Right now im Laying in Bed And writing this !D it is RAINING But isAs Been sunny all DAY. its currently 5:37pm. we are ABOUT to have Dinner its gonna Be GREAT! my Legs AXE freezing AHah. Anyway Bye Future me i love you So much And my FAMILY

DEAR Future me. 11years old - indie-Rose crane

NATURE is Amazing

WHAT APPROACHES DID YOU USE TO SUPPORT YOUR CHILD IN COMPLETING THESE SAMPLES?

Maths samples

As we take a natural learning approach for Indie, Her maths is based on “hands on” opportunities, everyday life and from the things she is passionate about ,I support her learning by offering my help and support whenever she requires it, by speaking clearly with her and helping her understand concepts better if she seems to be having a hard time figuring them out.Indie learns best by on the spot, open conversations, then and there. She is not interested in sitting down with a pen and paper, filling in maths questions or algorithms , instead Indie is very self directed in her learning and maths comes quite naturally to her thanks to her online gaming, video editing and coding .Over the last 3 years her maths skills have constantly been advancing and she is forever learning new maths concepts, from simple math sums, angles,from designing roblox house builds using geometry, shapes and length,to answering maths questions in certain roblox games,aswell as earning robux online to buy and spend on inventory - (using her addition and subtraction skills) .She uses maths when creating her roblox videos by using timing and grids.She has been using maths in everyday life from helping with cooking, weighing, pricing and selling produce and her own online buisness ventures.

In Indies math **sample 1** , I have included her pumpkin road stall market , in which her and her brothers harvest, weighed ,cut, wrapped in glad wrap, priced each pumpkin by weight \$4kg each , she rounded to the nearest dollar and we worked together with her brothers how much to sell based on weight in their notebooks, they then setup their own road side stall at the front of our house. She did this on 2 occasions already, she showed great communication skills, customer service skills, money handling and change sorting skills.She used on the spot thinking and mental maths. She and her brother made \$189 last month, she has many other product selling ideas for the near future also.

In maths **sample 2** I have included some of her online maths, she uses maths everyday in her online gaming, she is constantly learning new maths concepts when playing her online games, from designing roblox house builds using geometry, shapes and length, to answering maths questions in certain roblox games, as well as earning robux online to buy and spend on inventory - (using her addition and subtraction skills) going to “work” in roblox, advancing her money knowledge and so much more .I have attached copies of her earlier and later creations, You can notice how advance her maths designs are becoming in her placements and gridlines, her geometry and use of shapes

.I have also included another **sample 2** of her online maths samples and this is her fivver listings she created herself, in which she priced, marketed, worked out add ons additional prices and how long it will take her. She advertised that she can build someone a roblox house and cafe (as Indie has used fivver before to get someone else to build her a roblox house, and thought it would be a good way for her to make some money)

WHAT APPROACHES DID YOU USE TO SUPPORT YOUR CHILD IN COMPLETING THESE SAMPLES?

The arts samples

As we take a natural learning approach for Indie, Her creative arts is based on her pursuing her interests , her main focus on the 5 areas of the arts is visual art and digital art. Indie creates and edits her own youtube videos using software like capcut, and makes her marketing/thumbnails for her videos using canva, She has also been getting into creating roblox GFX's thumbnails she wants to get good at them to sell, she has been practising and advancing on this almost everyday. (a GFX is taking a normal roblox avatar and a rendering it into a realistic roblox avatar created and staged using graphic software and high definition graphics) I help support her in this area by offering my feedback with good open oral communication, which she is always takes onboard and applying to her designs, she always seeks out my opinions and asks help with designs if she needs. I always offer her my encouragement and provide her with the resources she needs and help her find resources to further her skills (in the form of online programs, editing software, videos , photo enhances , paint , pencils, etc) for **SAMPLE 1** I have included samples of her current interest GFX RENDERED thumbnails from over a month of her trial ~~and error~~, my feedback and her getting better in design, she has been creating this for her friends online using software blender and canva.

In **SAMPLE 2** I have included some of her online marketing and promotional templates/mockups she created for her roblox builds, fivver account and her roblox avatar tshirt merch she has been making)

WHAT PROGRESS DID YOU OBSERVE BETWEEN EACH SAMPLES?

English

I noticed in **sample 1** that indie had really improved her capital letter problems she had at the beginning of the year, she still is making minor mistakes, but we continue to discuss these, I have also noticed her handwriting (pen to paper form) is improving significantly as she is not rushing as much and becoming neater. I also noticed how better she is getting with her descriptive writing and punctuations.

In **sample 2** I can see Indie spent a lot of time planning her competition and marketing her work. She has shown great maturity in her writing, and advancing with her written skills. I will continue to show her encouragement and lend a hand whenever she needs my assistance.

Maths

Maths sample 1- I observed indie having real hands on maths learning experiences, I seen how well her money handling skills were and how she was able to work out mentally the correct amount of change to give back to her customers. We discussed a lot about kg and how to price the produce by weight that day, and I observed her being able to round to the nearest dollar when pricing, which was a great surprise as I didn't even know she had learnt that yet!

Maths sample 2 -

I can see how much Indies maths has advanced in her roblox builds, she is able to understand layout and grids better, as well as advance on her geometry, placements, length estimating and use of shapes. In her other sample 2 of her fivver listing, I observe how indie has been able to work out and price how long a gig will take her, how much her customer will need and how much additional "variations" and add ons will cost her customers (her maths and money handling skills have significantly improved since last year, as she would not have been able to run her own listing on a marketplace herself without seeking in me to help with calculations. I am very proud of her, she is waiting for her first fivver customer.

WHAT PROGRESS DID YOU OBSERVE BETWEEN EACH SAMPLES?

The arts samples

In sample 1 , I clearly observed she was taken my verbal feedback onboard, as we discussed how to edit her rendered photos even more by playing around with the photo editing tools (brightness, sharpness and highlight tools) to make them look more glossy-also to use more effects on the texts.I could clearly see that over the last few weeks , just how much trial and error has paid off, she has been researching everyday more ways on how to improve her gfxs and now adding other elements (which she creates from scratch-backgrounds)

In sample 2

I have observed her progression over the last few months since she has been using the app canva, in creating and producing promotional content for her roblox games, youtube videos and other marketing aspects , her stages of using this app are new and she is quickly picking it up and figuring out how to use the editing tools on there. I can see how much she has learnt in the past few months, as I also use canva daily to create my printables for my buisness. We both have many discussions and time together playing with designs, templates and effects on canva.I can see how much Indie has advanced with this new software, and as time goes on her design will get better.

English sample 1

Question

How has life been this year home-schooling while living on a tiny island? Can you tell me some things you have been up to?

It's been great. Being home-schooled and living in my dream island is just so nice and relaxing. It is so fun here and I enjoy spending time living here on Paradise! I have been up to a lot. Wanna know what I've been doing well sure!! Firstly I have been going to events, with lots of kids. I have many friends to hangout with! I usually play soccer a lot! It's so fun! And... I have been drawing a lot. I draw a lot of things mostly anime tho. I like to do game coding and I've made a few games on a app called Roblox. I do stuff on Blender too. I render GFX's on Roblox and I make them too. I like to play and text friends too. I have a server on an app with more than 95 people. aka my fans. I make YouTube videos weekly. I have more than 600 subs! I love to do random things too! I am gonna learn how to knit soon too! I love to go to the park too and forgot to mention I play a game on Roblox called Blox Burg. It is a fun game. I mostly build on there! anyways thx for reading hope you have a great day. cant wait to share more soon.

English sample 1 - comparison

The holiday program has now finished, can you tell me what you got up to? Did you enjoy it?

25-9-23

I loved the Program and I made so many friends. We went to the National Park and went on a mini Bus to get there. It was funny because our bus got stuck in the mud and they had to get a truck to pull it out. Me and my friends laughed so much. On a different Day a clown came, he was very funny and showed us some tricks, like juggling and plate spinning. I also went to a farm one Day and held chickens, they were so cute and one of them kept falling asleep on my Brother! We also had a Lego Builder come over from the show, our team won the Lego Building contest and my Brother won second place, oh and also my team came first at the scavenger hunt we had down at [REDACTED]. We ate some sausage sizzle for lunch, it was yum.

English sample 1 - comparison

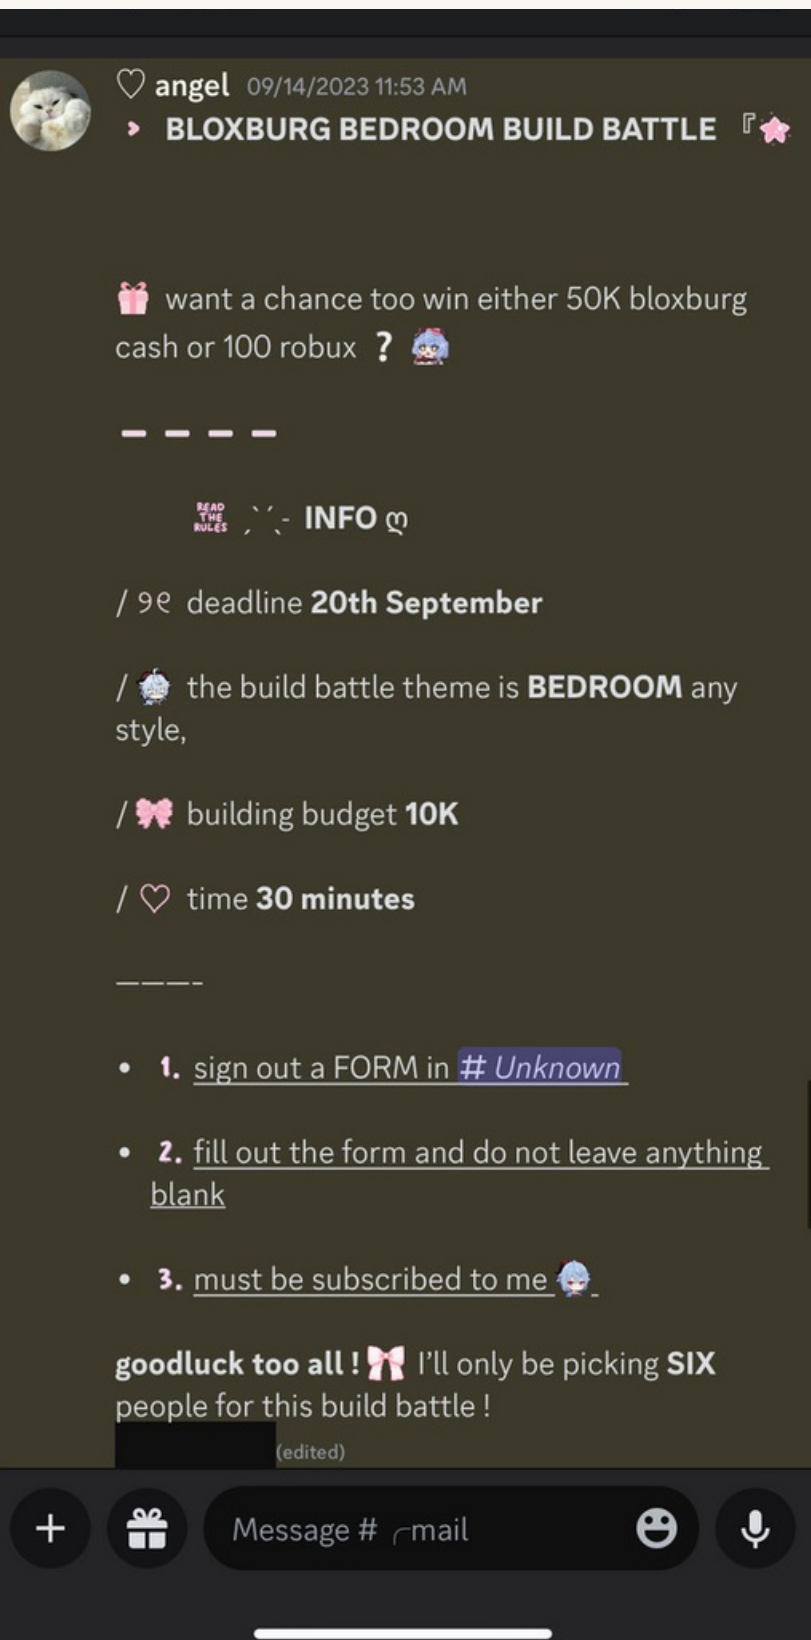

I Don't usually like sausages But the Police team came down to cook them just for us, they were nice!

I also did ~~such~~ more things at the program with! was very fun. I loved going to the program and would love to go again, once its on again!

It sounds like you had so much fun darling, but remember to watch your Capital letters and when to add a fullstop at the end of a sentence, your writing is getting so much neater.
Love mum
Indie-Rose

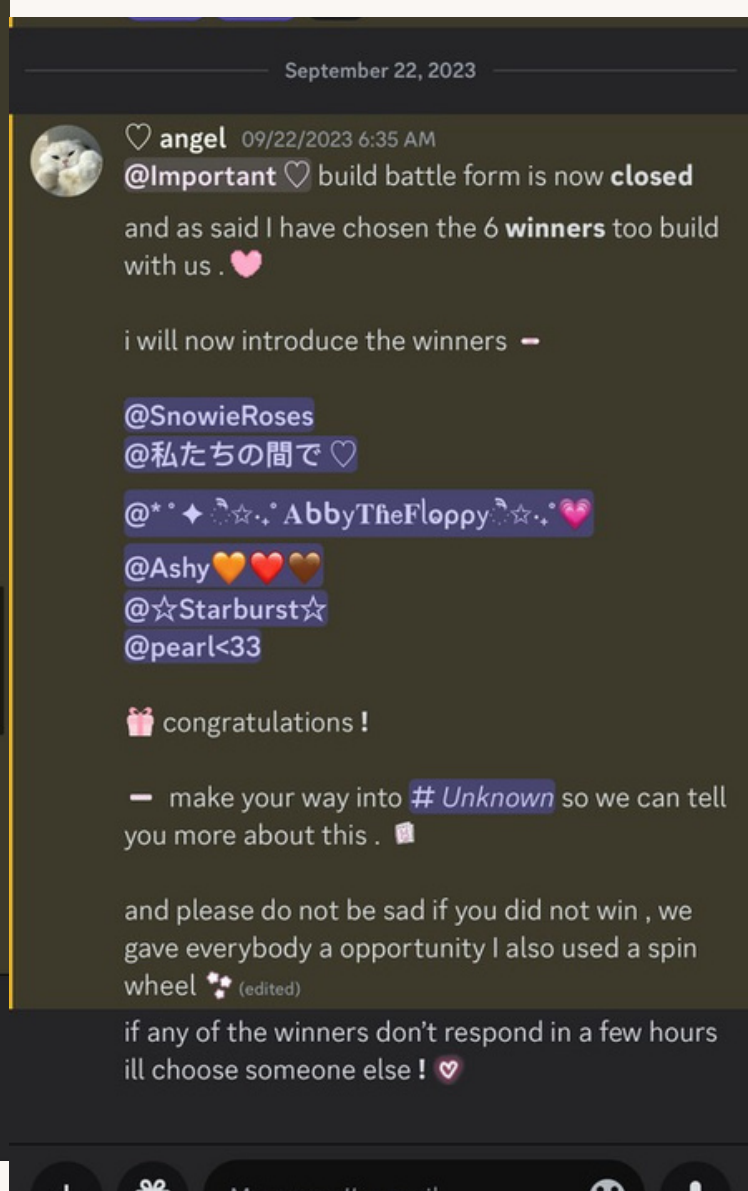

As we take a natural approach to Indies education, we have a lot of open discussions and her English is based on her passions. I do get her to complete little questions, like these in sample 1 for her home-schooling portfolio folder. I like to put together each year filled with any hard copy work she does, any drawings, photos of her learning that took place, for her to reflect on her learning experience for the year. As you can see in these samples, her writing is improving, she is using more expressive and descriptive writing than she did earlier in the year, she is still making a few minor capital letter mistakes that we have discussed.

english sample 2

build battle comp indie promoted and ran herself on her discover server, I can see the progression as last year there would have been know way she could of executed her own competition, herself without my help. This year she has became so much more mature and capable

Indie created this marketing banner for her competition using Canva , in the other photo, is the screenshot she took of her 6 contestants building

please note Indie goes by the name of angel online (as we have discussed, about her using her real name and the dangers involved on the online world, hence the names in these samples)

Maths sample 1

Indie and her brothers have now setup their own pumpkin stalls twice this year so far, with many more stalls planned when our crops and seedlings are ready. We plan on getting chickens and the kids want to sell the eggs to. Indie was able to learn real hands on maths experiences from calculating weight in kg, rounding to the nearest dollar, pricing, mental calculating correct change to give back to her customers, Indie, her brothers and myself all worked out together in the kids notebooks, figuring out the weight by using kitchen scales per pumpkin, roughly rounding to the nearest dollar to price pumpkins at \$4/kg, used our addition/multiplication skills to work it out, it was so good to see Indie interacting with her "customers" they made \$189 on their last stall, selling pumpkin and some of my business kids surf hats, they each got to keep \$30, indie brought robux with her money. They plan on having many more stalls when our other produce is ready and Indie is full of so many ideas on other things she can do to make some money, we will see what these ideas lead to next year.

pumpkin stalls were held
on 27 july and 7
september

Indie worked out and had open discussions with her brothers and myself the weight of each pumpkin, rounding to the nearest dollar, how much we should sell based on \$4/kg, and how we add each kg together as 4.

Pumpkin stall  Pumpkin

We have 9 Pumpkins

how Big they are

	Weight	Status	Sell For
1	2.6 kg	Sold	
2	4 kg	Sold	8 \$
3	6.2 kg	Sold	4 \$
4	1.3 kg	Sold	24 \$
5	1.7 kg	Sold	4 \$
6	3.1 kg	Sold	6 \$
7	1.1 kg	Sold	12 \$
8	3.1 kg	Sold	4 \$
9	4.4 kg	Sold	8 \$
			16 \$

equation \$4 For 1 kg
each hour ?

Pumpkins	Equation	how many kgs
1	$4 + 4 = 8$	2
2	$4 = 4$	1
3	$4 + 4 + 4 + 4 = 24$	6
4	$4 = 4$	1
5	$4 + 2 = 6$	1.5
6	$4 + 4 + 4 = 12$	3
7	4	1
8	$4 + 4 = 8$	2
9	$4 + 4 + 4 + 4 = 16$	4

We can make 86 Dollars

Sold them all
we made 108 Dollars.
Bcz customers gave us
tips. and sold 4 hats

Maths sample 2

Indie uses maths concepts everyday in her roblox building, from geometry, measurements, angles, placements, layouts, numbers, dimensions, scaling, money, additions, subtraction, grids, time and so much more, these sample are her recent builds, she works in bloxburg to earn money to create each one of her builds. The top builds are from July 27 and July 30th, simple layouts, and simple use of shapes/geometry/angles, etc

indie working on roblox, online to earn bloxburg cash to build, -everything she gets for her building costs money, so she has to work out budgeting, saving, financial goals, adding, subtracting. working with numbers and learning about money and time.

and these builds are from the 15-8 and 21-8 (as seen in screenshot) , you can see how much her math placement, grid work, geometry and measurements have advanced, in a few months,I gave her a few pointers, about placements, dimensions and lengths , and we discussed real world scales to that in roblox. We watched together a youtube video called Roblox Studio Real World Measurements in Studs by how tech to. I can see she has really been taking it onboard with her design.

and these examples for maths **sample 2** are some more of her online maths, these are her fivver marketplace listings, she worked out how to price her work, create her listing and market material, she worked out extra cost for add ons and the time it will take her to complete the job for someone (she has 2 listings on fivver 1 she can interior design someones bloxburg home and her other one is she can build someone a roblox cafe, she designed and created the marketing photographs aswell.

THESE DESIGNS WERE CREATED
VARIOUS DATES ALL IN AUGUST

Indie created these roblox real high defintiton GFX avatars in software app called blender, she then downloads them all onto canva and edits them even further,you can see how much she has progressed and advance in her design,editing and visual arts skilled within a month, I have been giving her verbal advice,assited her when she requires and we have been openly discussing different design ideas, as she wants to get really good to sell her GFXS

The arts sample 1 - comparison

THESE DESIGNS WERE CREATED VARIOUS DATES ALL IN SEPTEMBER, INDIE HAS BEEN CREATING THEM FOR HER FRIENDS

as we take a natural approach to Indies education ,you can see how much she has advance is her visual arts/digital arts designs over at month. Her current GFXS she has been creating from scratch using blender and canva have really improved, she has been experimenting with background designs to,she is still learning and mastering new techniques for her gfxs each week. She creates all backgrounds herself,by mixing colours,patterns and elements

The arts sample 2

Indie love arts and designs. She loves visual arts from a digital aspect, below is samples on just how much her design and eye for detail have been getting this year, below is all **MARKETING MATERIAL** and **PROMOTINAL POSTERS** she created for her fivver account,youtube channel,designs in roblox etc.They are all her own original designs. She is constantly researching interior house designs and loves to create .Shes always asking my feedback and taking it on board.We often discuss what different fittings, elements and layers are We also discuss how to resize her images.

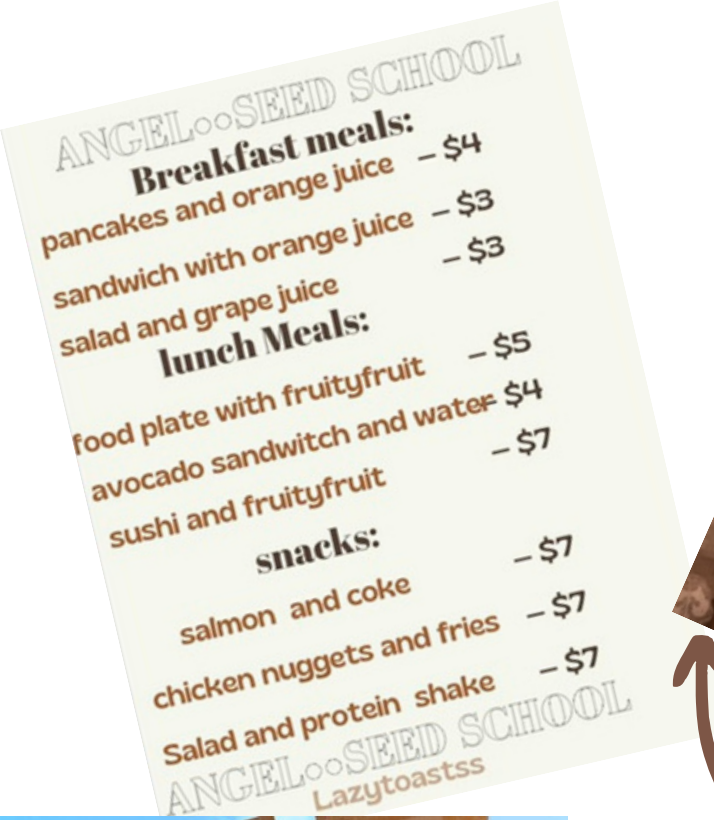

indie
created
these in
july 26th

these are indies interior design marketing mockups for her fivver listing, she wanted to go for a aesthetic look she said.She created a room layout and designed it herself,furnishings,appliances,colours ect, she then took screen shots and edited them further on canva software, adding descriptions and making them to correct size to upload.. (I helped her learn how to create a custom sizing)

Indies posters she created using canva app software , these were created in august between 22-24 ,these posters she created for her roblox, motels,schools and other “roleplays” in roblox and her youtube, she often comes and asks me what type of things are in motel rooms, or what do they serve ect, she loves to discuss and recreate/roleplay to the exact.

ANGELS RULES

- 1: LIGHTS OUT AT 9PM
- 2: DO NOT RUN AWAY WITHOUT WARNING US
- 3: DO NOT BE DISRESPECTFUL TOO STAFF
- 4: TRY TOO BE ROLEPLAYISH AND DONT TROLL PEOPLE
- 5: LISTEN TOO STAFF AND BE NICE
- 6: DO NOT GO OUTSIDE OR IN STAFF ROOMS WITHOUT PERM
- 7: IT COAST MONEY FOR FOOD (OUT OF RP)
- 8: MUST PAY 80 EACH STAFF AGAIN OUT OF RP

these are her latest (september 13th) youtube -lazytoastss (roblox avatar merch) tshirts she created to sell on roblox. She creates them using the tshirt template and when she upload it, it turns into a shirt depending on how you design it. She has sold quite alot of merch on roblox (she earns robux if someone buys them) We both watched some how to youtube videos together when she first started creating them, now she is able to make and design them all by herself,she wants to start learning how to make pants

AT WHAT LEVEL ARE THESE SAMPLES TARGET?

As our holistic approach for Indie's education is to learn at her own natural pace, these samples aren't targeted at a "specific age level" - There is no learning expectations, just encouragement, I trust she will learn everything she requires when the time comes.

CONCLUSION

Indie is a very determined learner, she is a very polite, good natured and a strong minded young women who knows where she is heading in life, she is not afraid to ask for help, to take onboard feedback and is confident in herself and her abilities. Indie will continue to learn and grow in a place that supports her natural curiosity, allows her time for real hands on active engagement, and shown 100% support.
