Instructions for the DIY

SEE THROUGH WINDOW EASTER EGG

what you will need

- scissors
- A4 size thick cardstock
- Laminator and laminate pouch
- glue and/or tape
- things you find in nature , eg flower petals,leaves ect

step by step

1 -First print out the egg template 2 times (these are used for one for front and one for back of egg)
(print on A4 SIZE THICK CARDSTOCK -the thicker the better)

2 -Next cut out the white egg in the middle of both your egg templates (this will be the window)

3 -Next get your child to decorate a laminate pouch with nature - collections (flower petals,leaves ect)

4 -Once your design is ready put it through your laminator.

5 -Once it is ready -mark out your egg onto the laminated pouch using a marker (don't use a permanent marker so you can wipe it clean after you cut it out) give yourself room over the line you have drawn when cutting as you want the window alittle bit bigger then the cut out middle part.

6 -Once that is all done, tape/glue your window to one of your eggs , then glue the other half on top.

enjoy
